Engineering Unit II

Glenn Pratt, Chief
Special Permits Section

THRU: Kenneth A. Fenner, Chief
Water & Hazardous Materials
Enforcement Branch

RECEIVED

MAY 22 1981

WASTE MANAGEMENT BRANCH
EPA, REGION V

Pursuant to your May 1, 1981, referral, it was discovered that the above-referenced site is directly connected with the notorious "Dead Creek" site which the HMERP committee has been tracking with Illinois Environmental Protection Agency for the last six months. Region V's Office of Superfund has been working with the State toward developing the site as a Superfund candidate. Accordingly, the HMERP committee recently decided to relegate further investigation of Dead Creek to the Superfund Office. By this memo, the information regarding the U.S. Chemical Warfare Service dump will be referred to the Superfund Office. The Superfund contact on Dead Creek is Tony Rutter.
